RULEMAKINGS AND  
ADJUDICATIONS STAFF

**Don't let the United States become the world's radioactive waste dumping ground!**  
I urge the Nuclear Regulatory Commission to deny license applications 1W023 and  
XW013. These applications would allow EnergySolutions to import some 20,000 tons--a  
million cubic feet--of radioactive waste from Italy into the United States. Energy-  
Solutions proposes to ship this waste into SC and LA, "process" it in Tennessee, where it  
could be incinerated, dumped in regular trash landfills, or "recycled" into consumer and  
industrial goods, and then ship the remainder to Utah for shallow land burial.

This scheme is fraught with unnecessary danger, could increase radiation exposures to  
the public, and would set a terrible precedent. The United States must not become the  
dumping ground for the world's radioactive waste. These applications must be rejected.
