**SUMMARY FOR THE  
TELEPHONE CONFERENCE CALL FOR  
BEAVER VALLEY POWER STATION, UNITS 1 AND 2  
LICENSE RENEWAL APPLICATION**

April 30, 2008

In this telephone conference call, the U.S. Nuclear Regulatory Commission (the NRC or staff) and representatives from FirstEnergy Nuclear Operating Company (FENOC) discussed the Request for Additional Information (RAI) for replacement activities of the Beaver Valley Power Station (BVPS) Unit 2 steam generators (SG) and associated refurbishment environmental impacts analysis. The NRC staff indicated that the response to the March 13, 2008, RAI ENV 3.0-1 (regarding Refurbishment Activities) had been received. The NRC staff added that the Draft Environmental Impact Statement (DSEIS) would summarize FENOC's response and position as well as the NRC staff's review of environmental impacts analysis related to the Unit 2 SG replacement. The NRC staff indicated that, although it was not specifically requested in the RAI and, as such, it was not addressed in the RAI response, the applicant needed to indicate if new or significant information had been identified during its review of Category 1 impacts associated with refurbishment. FENOC agreed to supplement the RAI response with the Category 1 information by May 30, 2008.
