You have a 90% confidence interval. The upper bound is at the 95% level. The lower bound is at the 5% level.

Chris

>>> Michael Waters 08/03/2006 9:43 AM >>>

Thanks. We need to recheck Appendix A and reconcile the terminology when discussing confidence interval versus confidence level.

Are we calculating the 90th% confidence interval that lies between the 5th and 95th confidence levels ?

Thanks,

Mike

Mike,

Slide 14, 4th bullet should indicate 90th percentile confidence interval.
It was calculated between the 5th and 95th limits.

Also, Amit is out sick today. I have forwarded the info to his home e-mail address. I didn't notice anyone missed on slide 2.

George

Attached are a revised draft of the slide presentation based on our walk-through meeting yesterday. I plan on noodling the fonts and talking points tomorrow morning and send the final presentation to HLWRB by mid-morning.

Other than that, please let me know if you have any clarifications to the parts I revised.

Albert/Amit, please let me know if I missed any primary contributors on slide 2, including spelling errors

Jon, please look at proposed dates on path forward to see if they are reasonable with your internal schedule.

Thanks,

Mike
