Subject: Follow up on Discussion with Tool

Albert,

I concur with Tina that the HRA model should be removed.

I also suggest removing SAPHIRE. This software was not made for the ACCESS environment. The version is the Tool is very much out of date. The general practice is to download the most current version before starting a new project.

There is no need for MELCOR. It too may be out of date. Also, most of us do not have the skills to use it.

Chris
