OFFICE OF SECRETARY
 RULEMAKINGS AND
 ADJUDICATIONS STAFF

Dear Sir or Madam:

Please deny the license applications 1W023 and XW013, which would allow Energy Solutions to import radioactive waste from Italy. The U.S. must not become the radioactive dumping ground for the world — or for even one other country.

Energy Solutions wants to import about 20,000 tons of radioactive waste into South Carolina and Louisiana and to process it in Tennessee. After processing, it might be dumped into landfills or "recycled" into consumer and industrial goods, with some of it ending up in Utah. Such a procedure would set a terrible precedent and might not be safe for the public. Please, please reject these applications.

Thank you.

Sincerely,

Marjory M. Donn
