

RESEARCH OBJECTIVES

- Conduct independent experiments and analyses to develop technical bases for supporting realistic safety decisions.
- Provide information for identifying and resolving safety issues, making regulatory decisions, and promulgating regulations and guidance.
- Generate data to evaluate safety issues involving current and new designs and technologies.

COLABORATION OBJECTIVES

- Generate sufficient data to provide the technical basis for regulatory decisions related to A690/52/152 in a timely manner
- Provide a proactive approach to identifying and resolving PWSCC related safety issues
- Effectively and efficiently use resources
- Reduce unnecessary duplication of effort
