To: CHAIRMAN Resource
Subject: Evaluation of IAEA activities on Control of Radioactive Sources

Dear National Regulatory Authority,

The Office of Internal Oversight Services at the IAEA is conducting an evaluation of the Subprogramme K.5 Control of Radiation Sources within the Department of Nuclear Safety and Security. This Subprogramme aimed at improving the safety and security of sources of radiation through developing standards, guidance and international undertakings such as the Code of Conduct of the Safety and Security of Radioactive Sources and providing direct assistance to Member States in rendering their vulnerable radioactive sources safe and secure.

An important element of this evaluation is the assessment from the Member States' perspective. For this purpose, we have prepared a questionnaire that covers all activity areas under the sub programme from 2002. You can access to the questionnaire by clicking at the link below:

<http://vovici.com/l.dll/JGs72615094B6lnDy9U626J.htm>

Your feedback, whether positive or negative, will contribute to our understanding of how the IAEA's activities on control of radioactive sources can be improved in the future to better meet the needs of Member States.

Results of this survey will be examined together with other information collected during the evaluation. Your response will be kept confidential and will be used in an aggregate format.

It would be very much appreciated if the response is received by 09 May 2008, so as to enable finalization of the evaluation report on time.

Thank you and best regards,

Itziar Arispe
