Conversation on April 18 and 24, 2008 with John
Chorzal the RSO

The reviewer spoke to JC to obtain additional information on Dr. James. The preceptor that was submitted indicated that Dr. James did not have generator elution experience. JC stated that he thought if the licensee is not going to use generators that this part of the regulations would be N/A. After explaining the new regulations to JC. JC contacted Dr. James who confirmed that he had experience during his training at Mallinckrodt Institute of Radiology, Washington University between 7/1/93 and 6/30/97. There is also a letter stating his active role in Nuclear Medicine since 1997. This action is completed.
