Subject: License Amendments

Dear Sir or Madam:

03002490

After our recent inspection by your agency, it was recommended that our current license be amended to reflect our current operation. Some items were due to our anticipation of providing a new service that was never implanted, and some are removing licensed users and or procedure that are no longer here or are being performed. Attached is our list of changes that need to be made to our NRC License No. 29-06759-01

If you have any questions with regards to these changes please feel free to contact Walter Halma – Administrative Director for Medical Imaging – Division of Nuclear Medicine at (973) 877-5285.

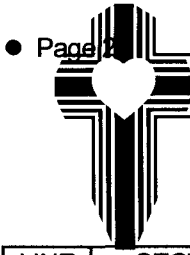

Sincerely,

Suresh Mody, M.D. – Chairman of Medical Imaging
Radiation Safety Officer
