

Dear Mr. Secretary,

Please consider my plea for NOT allowing nuclear waste from other countries, dumped anywhere in our beautiful country.

The stigma attached to such a decision would forever hurt our reputation as "the greatest country in the world".

There is no way to prove the concentration of the waste after it is contained, how would we know for sure, we wouldn't be getting a higher grade than we allow?

Please consider, that if other countries want nuclear power , THEY must plan for the waste, when they plan for the plants. Their lack of planning should NOT be our responsibility or concern.

No one I've spoken to about this issue believe we should receive this waste.

Please do the right thing, for the future of our children and grand children..

Thank you,
Sharon Forbes
