Mr. Gregory Gibson, Manager
Regulatory Affairs
STP Nuclear Operating Company
P. O. Box 289
Wadsworth, TX 77483

SUBJECT: REQUEST FOR ADDITIONAL INFORMATION LETTER NO. 37 RELATED TO
THE SRP SECTION 02.04.10 FOR THE SOUTH TEXAS COMBINED LICENSE
APPLICATION

Dear Mr. Gibson:

By letter dated September 20, 2007, STP Nuclear Operating Company (STPNOC) submitted for approval a combined license application pursuant to 10 CFR Part 52. The U. S. Nuclear Regulatory Commission (NRC) staff is performing a detailed review of this application to enable the staff to reach a conclusion on the safety of the proposed application.

The NRC staff has identified that additional information is needed to continue portions of the review. The staff's request for additional information (RAI) is contained in the enclosure to this letter.

To support the review schedule, you are requested to respond within 45 days of the date of this letter. If changes are needed to the safety analysis report, the staff requests that the RAI response include the proposed wording changes.

Mr. Gregory Gibson

Docket Nos. 52-012 and 52-013

SRP Section: 02.04.10 - Flooding Protection Requirements

Application Section: 02.04S.10 - Flooding Protection Requirements

QUESTION

02.04.10-1

Section C.I.2.4.10 of Regulatory Guide 1.206 specifies that “the applicant should describe the static and dynamic consequences of all types of flooding on each pertinent safety-related facility.” Also, Section C.I.2.4.14 states that “if the applicant will use emergency procedures...appropriate water levels and lead times available should be provided. The applicant should develop specific details on ... (2) the amount of time available to initiate and complete emergency procedures” To meet the above requirements, provide, in addition to severe flooding levels, other flooding parameters such as flow velocity and duration (beginning, peak, and ending) of inundation important for design of safety-related SSCs and preparation of emergency procedures.
