

SAFETY INSPECTION REPORT AND COMPLIANCE INSPECTION

1. LICENSEE/LOCATION INSPECTED:

Pacific Radiopharmacy, Ltd.
347 North Kuakini Street
Honolulu, Hawaii 96817

2. NRC/REGIONAL OFFICE

USNRC Region IV
612 East Lamar Blvd. Suite 400
Arlington, Texas 76011

REPORT NUMBER(S) 2008-001

3. DOCKET NUMBER(S)

030-12031

4. LICENSEE NUMBER(S)

53-16991-01MD

5. DATE(S) OF INSPECTION

April 24-May 9, 2008

LICENSEE:

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

- 1. Based on the inspection findings, no violations were identified.
- 2. Previous violation(s) closed.
- 3. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy to exercise discretion, were satisfied.

_____ Non-Cited Violation(s) was/were discussed involving the following requirement(s) and Corrective Action(s):

- 4. During this inspection certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance 10 CFR 19.11.

(Violations and Corrective Actions)

10 CFR 71.5(a) requires, in part, that each licensee who transports licensed material outside of the site of usage, as specified in the NRC license, or where transport is on public highways, shall comply with the applicable requirements of the Department of Transportation (DOT) regulations.

49 CFR 172.200(a) requires, in part, that each person who offers a hazardous material for transportation shall describe the hazardous material on the shipping paper in the manner required by 49 CFR Part 172, Subpart C.

49 CFR 172.203(d)(1) requires, in part, that the description for a shipment of a Class 7 (radioactive) material must include the name of each radionuclide in the Class 7 material.

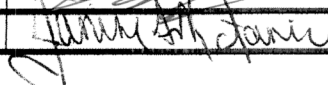

Contrary to the above, during the time period from April 24-28, 2008, the licensee shipped packages of Class 7 material, but several of the shipping papers did not contain the name of each radionuclide in the shipment. As an example, the shipping papers for a shipment of Class 7 material on April 25, 2008, to Customer 6, Delivery 2, did not include the name of each radionuclide in the shipment. Specifically, the shipping papers listed "Myoview" as the radionuclide, and "Myoview" is not the name of a radionuclide.

The licensee's corrective actions include, but are not limited to: updating licensee's computer program so that the name of the radionuclide (Tc-99m) is included on the "Myoview" entries on the shipping papers and manually entering the name of the radionuclide (Tc-99m) on the shipping paper next to the "Myoview" entries until the computer program is updated.

This is a Severity Level IV violation.

Licensee's Statement of Corrective Actions for Item 4, above.

I hereby state that, within 30 days, the actions described by me to the inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.
