Ms. B. Marie Moore, Vice President
Safety and Regulatory
Nuclear Fuel Services, Inc.
P.O. Box 337, MS 123
Erwin, TN 37650

SUBJECT: NUCLEAR FUEL SERVICES, INC., INTERNALLY AUTHORIZED CHANGES
FOR CALENDAR YEAR 2003 AND ISA SUMMARY FOR THE URANYL
NITRATE BUILDING (REVISION 3) SUBMITTAL DATED JANUARY 30, 2004,
PUBLIC DISCLOSURE DETERMINATION (TAC NO. L31808)

Dear Ms. Moore:

This is in response to your letter and affidavit dated January 30, 2004 (NFS No. 21G-04-0018), requesting that Attachment 2 to this letter, which consists of the Integrated Safety Analysis Summary for the Uranyl Nitrate Building (Revision 3), be withheld from public disclosure pursuant to 10 CFR 2.790(b)(i)(B).

You stated that the submitted information should be considered exempt from public disclosure for the following reasons:

1. The information contained in the cited document has been held in confidence by Nuclear Fuel Services, Inc. (NFS), in that it contains trade secrets or commercial information as specified in Title 10, Code of Federal Regulations, Part 2.790(a). The basis for requesting that the document be withheld from public disclosure is explicitly marked on the cover page to each of the aforementioned documents and/or the top of each affected page, as appropriate, in accordance with 10 CFR 2.790(b)(i)(B).
2. The information contained in the cited document is the intellectual property of NFS, and as such, is customarily held in confidence by NFS. As such, NFS has customarily submitted privileged and confidential information of this type to the Nuclear Regulatory Commission (NRC) and to its predecessor, the Atomic Energy Commission, in confidence.
3. The information contained in the cited document has not been made available to public sources by NFS, nor has NFS authorized that it be made available. In accordance with NFS policies governing the protection and control of information, proprietary information contained herein has been made available, on a limited basis, to others outside NFS only as required and under suitable agreement providing for nondisclosure and limited use of the information.
4. The public disclosure of the information contained in the cited document is likely to cause substantial economic harm to the competitive advantage held by NFS. The basis for withholding said information is that it contains distinguishing aspects of a process, methodology, or components, the exclusive use of which provides a competitive advantage for NFS in product optimization or marketability.

We have reviewed your application and the material in accordance with the requirements of 10 CFR 2.790 and, on the basis of your statements, have determined that the submitted information sought to be withheld contains proprietary commercial information.

Therefore, the version of the submitted information marked as proprietary will be withheld from public disclosure pursuant to 10 CFR 2.790(b)(6) and Section 103(b) of the Atomic Energy Act of 1954, as amended. The non-proprietary versions, which you submitted by letter dated January 30, 2004 (NFS No. 21G-04-0018), will be made publicly available.

Withholding from public inspection shall not affect the right, if any, of persons properly and directly concerned to inspect the documents. If the need arises, we may send copies of this information to our consultants working in this area. We will, of course, ensure that the consultants have signed the appropriate agreements for handling proprietary information.

If the basis for withholding this information from public inspection should change in the future such that the information could then be made available for public inspection, you should promptly notify the NRC. You should also understand that the NRC may have cause to review this determination in the future, for example, if the scope of a Freedom of Information Act request includes your information. In all review situations, if the NRC makes a determination adverse to the above, you will be notified in advance of any public disclosure.

If you have any questions regarding this matter, please contact Mike Lamastra of my staff at (301) 415-8139 or by e-mail at mxl2@nrc.gov. Please reference the above TAC No. in future correspondence related to this determination.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

/RA/

Robert C. Pierson, Director
Division of Fuel Cycle Safety
and Safeguards
Office of Nuclear Material Safety
and Safeguards
