Subject: Nuclear dumping from foreign countries

Dear Sirs,

It was brought to my attention by our congressman Bart Gordon that the Nuclear Regulatory Commission is considering an application to allow the importation of 20,000 tons of radioactive waste from Italy. The question I have is does Italy not have land that they can not dump their own waste in? Why does the United States always have to be the one that says sure we will handle this so that we do not look bad in the international community. To be frank I am sick and tired as a citizen of this great country to be the baby setters for other countries. We for once need to take care of our needs and especially when it comes to all the radioactive waste we make; and this is probably a huge amount in itself that we will have to worry about the health damage to humans and the environment for hundreds of years. My family says no to this application.

Your Truly,
David McKee
