I cannot believe that the United States of America is actually let other countries send their nuclear waste materials to our country. I cannot believe we didn't know this was happening. Now I hear whoever the powers that be are, want to use Tennessee as a place that processes and incinerates the nuclear waste and then send it on to a Utah disposal site. It should not be happening at all anywhere in the United States. It's bad enough that we don't know how to dispose of our own nuclear waste, let alone bring in more from foreign countries.

It was on one of our news stations that we learned this was not general information for the general public to know about. It might not have been covered at all if Tennessee had not been one of the places mentioned.

So we are sending this e-mail to let you know that we are against it and will be telling our senators and representatives that we are against it. I can't imagine anyone being for this.
