Subject: Energy Solution Import License Application IW023

I have always been proud to say that I am an American Citizen.

However, lately with some of the decisions that our government leaders have made under the pretense that their action will be for the benefit of their constituents is absurd!

- Remember when it was better to control our ports, and police goods entering our country using foreign companies?
- How about. . . it will be better to have goods manufactured outside our country so it would lower our prices? Did anyone consider the loss of jobs and increased unemployment in our country.
- Let illegal aliens cross our borders freely. They'll do the work that our people don't want. I remember attending a 50th high school reunion talking to a friend that sent eight kids through college working as a mason (brick layer). How many "meaningless" jobs like this have been taken by "others?"

Here we are again! Now our governmental leaders are considering turning our country into a nuclear dumping ground by importing 20,000 tons of radioactive waste from Italy. After Italy, who's next? How much will they want to bring?

How crazy can you get? This is something we will have to live with forever. What about our exposure as it enters our country, the transportation to processing areas and further transportation to final storage? What about the storage monitoring costs? Where do we go with the waste we create as our dumping grounds are filled?

Thank goodness we have someone (Bart Gordon) in Washington looking out for our welfare and keeping us informed before it is too late.

Needless to say, **VOTE NO! VOTE NO!**
