Subject: Re: EnergySolutions Import License Application IW023

This in response to mail we received concerning the application to allow the importation of 20,000 tons of radioactive waste from Italy.

Here are our concerns:

1. The United States has limited space for our own nuclear waste.
2. Tennessee does not need to be the recipient to process this waste.
3. We do not need to load our highways with trucks hauling waste.
Our highways have enough traffic on them without putting more traffic on our roads and creating a hazardous situation, and also the cost of maintaining our highways would add more cost for the upkeep of the highways.
4. We will have to monitor it for hundreds of years. What a burden to put on future generation to take care of this.
5. We fear contaminating our soil and our people that will have to deal with this
6. If we let Italy do this, we are opening the doors for all of the other countries to dump their waste on us.

My husband and I, as taxpayers oppose this action as being irresponsible and dangerous for the American people and country.

Thank you
