Subject: Proposed Nuclear power plant in Gaffney

I live in Greer, which would be between your proposed plant and the one in Oconee. I don't think it is fair to have two here. The adverse impact on one is enough for taxpayers to deal with, what with the increased cancer incidents in oconee.

You want to do something, then build a few windmills. They will provide free clean energy and will also employ people to build them. We have plenty of places to install them and the benefits of windmills would greatly outweigh those of another power plant.

Of course, knowing the government and how you let us know what you are thinking, you have probably already made your decision and it is practically a done deal. I'm writing just in case you haven't and that maybe you would actually listen to the people.
