**Subject:** Comment on Lee Plant

I am encouraged that Duke is attempting to provide their customers with an alternative to the oil problem we face. I was involved with the Duke Nuclear plant that now sits idle in northeast Alabama and saw how diligently Duke dealt with that environment and the safety of that area.  
I would hope that the politicians do not knuckle under again due to some rat or owl endangerment. We will live in the dark ages again if we don't begin to use the recourses given by God to this country. Nuclear power is clean and efficient and economical and SAFE.

Thanks,

Dick Ebert
