MEMORANDUM TO: Richard P. Raione, Chief  
Environment Projects Branch 2  
Division of Site and Environmental Reviews  
Office of New Reactors

FROM: Linda M. Tello, Project Manager */RA/*  
Environment Projects Branch 2  
Division of Site and Environmental Reviews  
Office of New Reactors

SUBJECT: SUMMARY OF PUBLIC SCOPING MEETING CONDUCTED  
RELATED TO THE REVIEW OF THE WILLIAM STATES LEE III,  
UNITS 1 AND 2 COMBINED LICENSE APPLICATION

The U.S. Nuclear Regulatory Commission (NRC) staff conducted an environmental scoping meeting related to the review of the William States Lee III, Units 1 and 2 (Lee) combined license (COL) application submitted by Duke Energy Carolinas, LLC (Duke). A public meeting was conducted on Thursday, May 1 2008, at the Gaffney High School. Approximately 150 people attended the meeting. The participants included members of the NRC staff, NRC contractors from Pacific Northwest National Laboratory, members of the public, representatives from Duke, the news media, state agencies, local residents, and local government officials. Public comments and questions were mainly focused on the COL process and e-filing, nuclear waste and safety, socioeconomics and impacts to the Broad River.

The purpose of the meeting was to provide the public with an opportunity to participate in the environmental scoping process by providing comments on any issues the public thought the NRC staff should consider while preparing a supplemental environmental impact statement for the Lee COL application. During the meeting the NRC staff presentation outlined the overall licensing process under 10 CFR Part 52; provided a description of the National Environmental Policy Act of 1969 review process; discussed the environmental requirements outlined in 10 CFR Part 51; and addressed how these requirements would be implemented during the Lee COL review.

A list of the meeting participants is provided in Enclosure 1. Enclosure 2 contains the handouts from the meeting (Agenda, Open House Handout, and *Federal Register Notice*). Enclosure 3 is a copy of the NRC slide presentation. The corrected transcripts are provided as Enclosure 4. Written comments and documents submitted during the meeting are included in Enclosure 5.

CONTACTS: Linda Tello, NRO/DSER
