Subject: Energy Solutions Import License Application IW023

The Nuclear Regulatory Commission,

It's my understanding that NRC is considering an application to allow the importation of 20,000 tons of radioactive waste from Italy. We have learned the plan is for the waste to be incinerated in the State of Tennessee and the remains sent to a Utah disposal site. There's a limited, finite amount of storage in Clive, Utah.

Although Italy may have a problem, we in the United States have limited space for nuclear waste. We cannot be all things to all people. Other countries should bear the responsibility of disposing of their own waste. If we open our country to radioactive waste from all countries, everyone will jump at the idea to be rid of their serious problem forever. We need to ensure the United States has space to dispose of our own nuclear waste.

Accepting, incinerating and disposing of the waste would not be end; then, we must monitor it for hundreds of years.

I strongly urge you to reject Energy Solutions Import License Application IW023.

Glenda Gribble
