To:  
Materials Licensing Branch  
U.S. Nuclear Regulatory Commission  
Region III,  
2443 Warrenville Road, Suite 210  
Lisle, IL 60532-4352

Reference: Byproduct Material License No. 13-32192-01

To comply with the revised regulations, please accept this letter and attachment as our application to amend the above referenced Byproduct Material License to add the NARM material used at our facility (I-123 iodide capsules) for diagnostic purpose. We also use Strontium-82/Rubidium-82 generator. The Rubidium-82 elution from the generator is used for diagnostic cardiac studies. Attached please find a sketch of the PET facility.

I hope this information is satisfactory. Should you have any questions, please contact our consultant, Ashwin Patel, cell phone number 352-428-8132.

Sincerely,

Nawar Mercho, M.D.  
Radiation Safety Officer
