Address and Security
For
Ideal Sources Licenses

We have leased space at the following address

409 Vandiver
Bldg 4, Suite 201
Columbia MO 65202

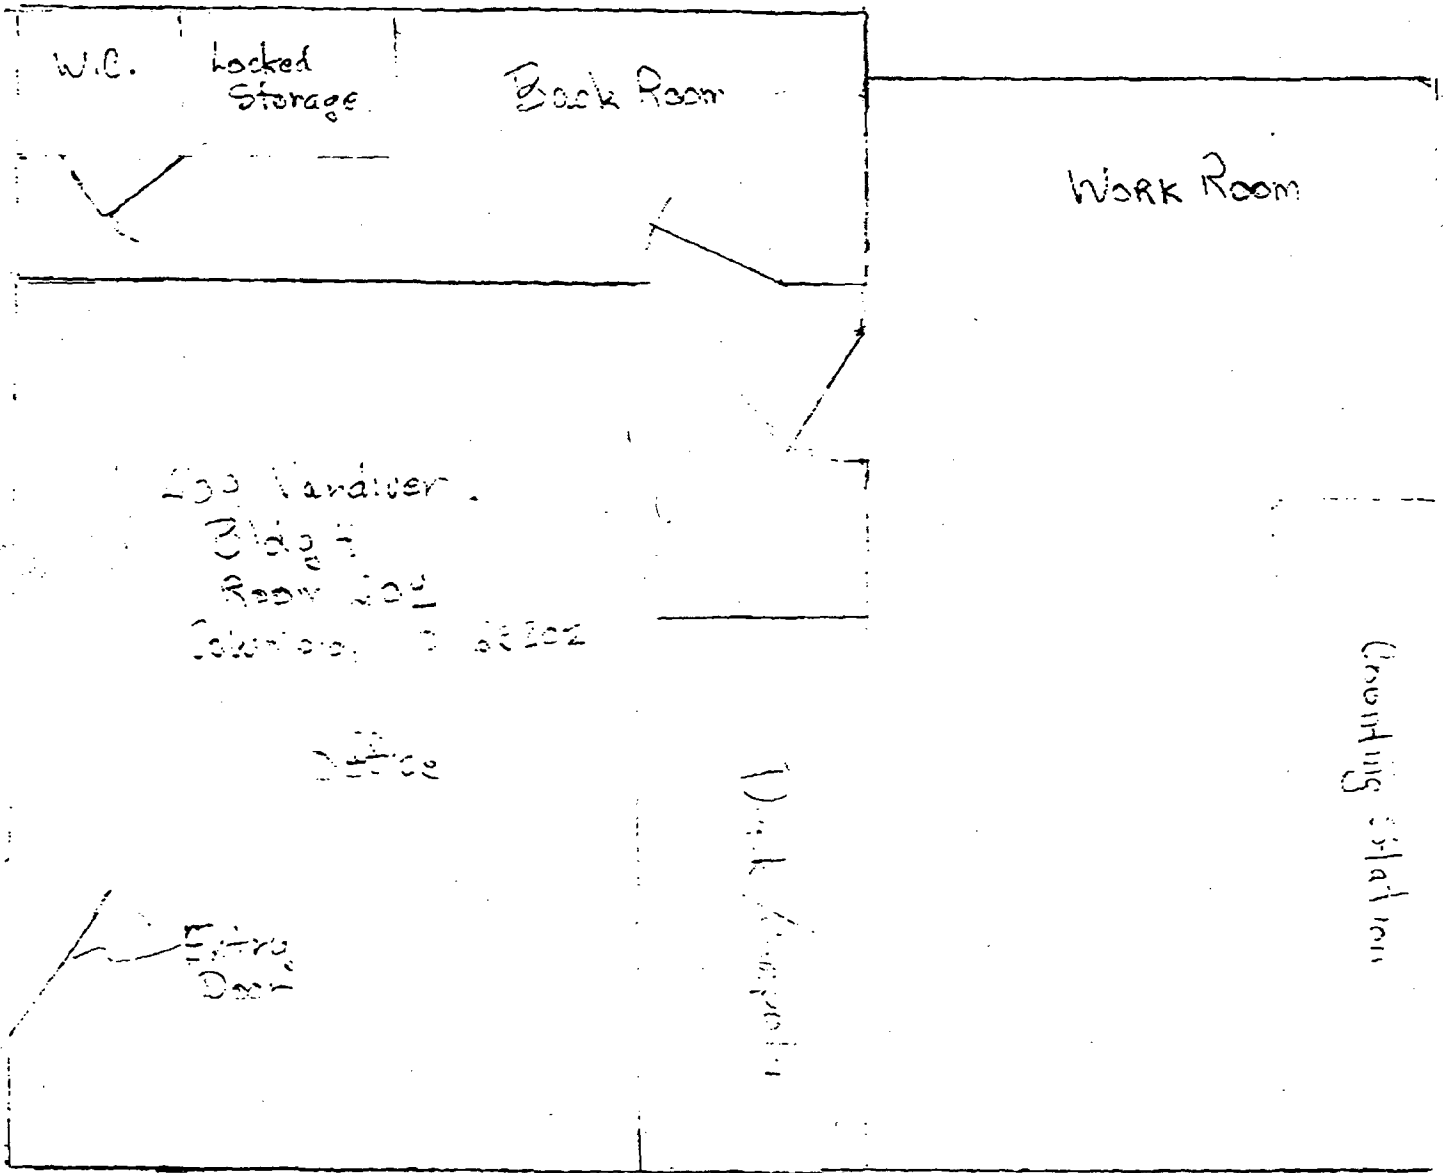

Security arrangements:

(b)(4)

We welcome any suggestions from the NRC that would provide additional security, but recognize that all stones and sources have very low activities, representing minimal risk to the staff or outsiders. In addition, if the release plan proposed in the application for "Importation and Exempt Release" is acceptable, the inventory of stones (and by-product material) will be small, of order 200,000Bq during periods when the Q/A procedure is in progress. At other times, the inventory will be orders of magnitude lower.

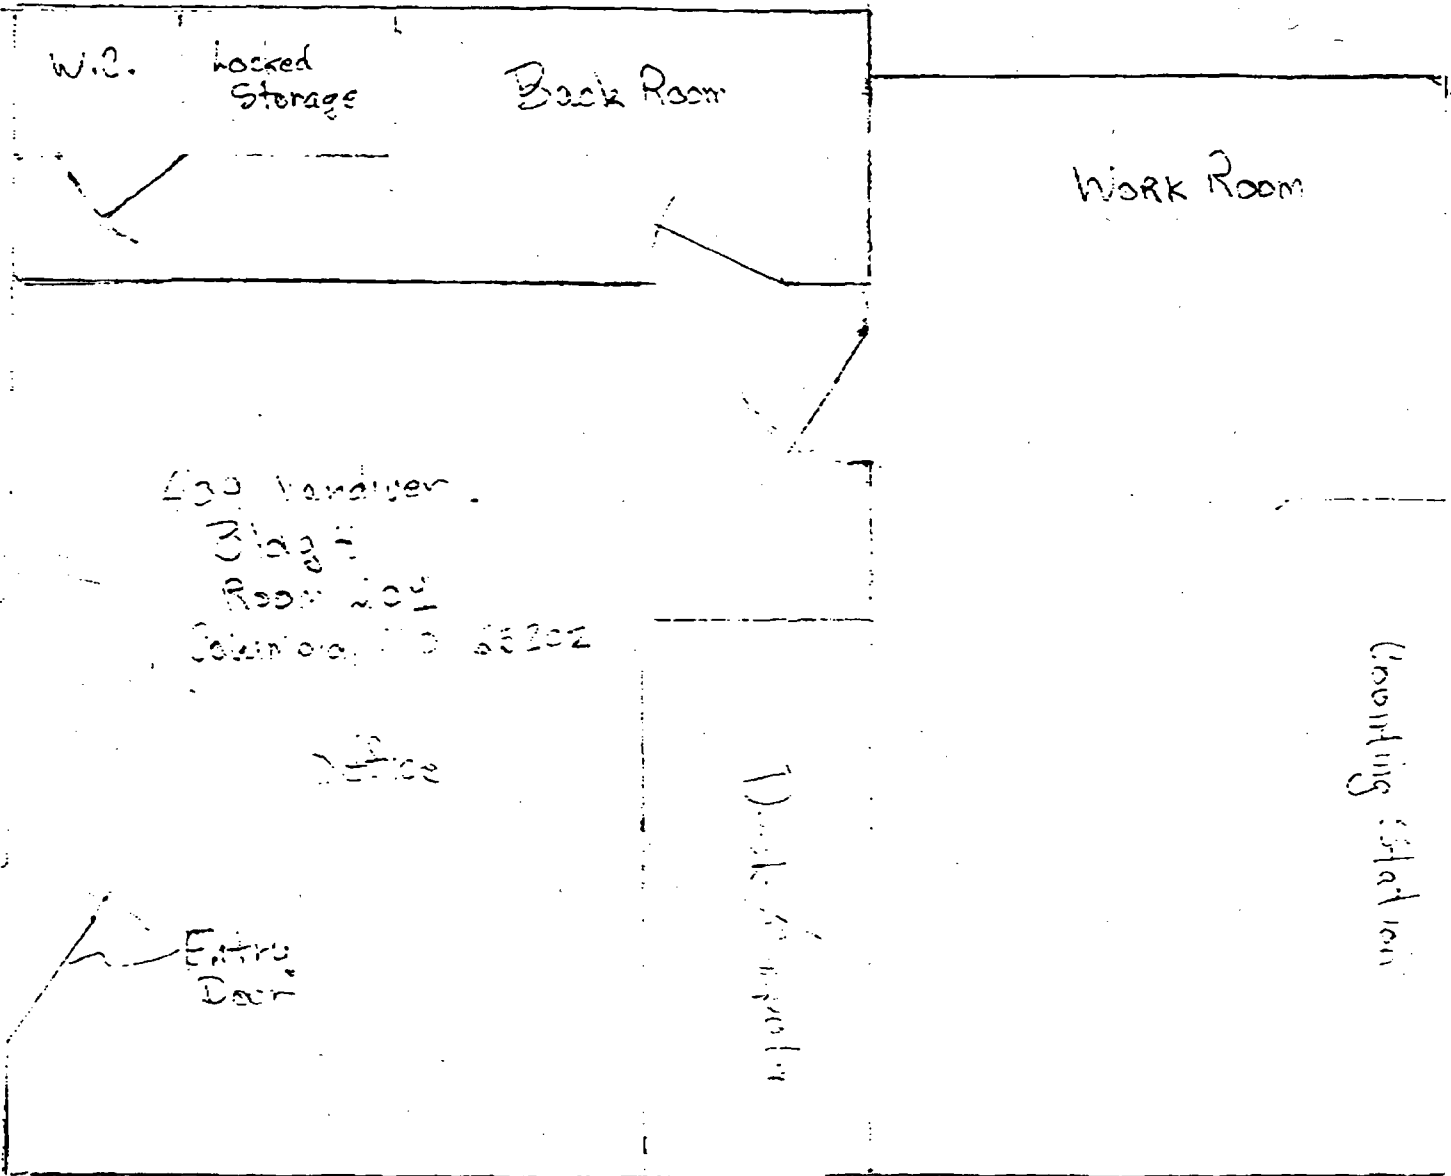

Please refer to the attached sketch for the overall layout of the office.
