NO dumping!!!!!! When are Americans and Government ever going to think or learn before they do things. Geeze what do we have left here?

Most of everything here is owned by foreign groups, including our land: most of everything we eat drink and buy are made in other countries and imported, we have a little voice in things officially but the words don't really count.....are just a formality.

I believe we ought to practice the words we preach "just say no". I am 72 years old. Year by year I see ways we are killing ourselves and the other countries are right there beside us. How about keeping their wastes in their homelands.

I am so tired of hearing equality for all and have none of my own or those in our population. If we produce the same wastes keeping it here is also true but a fact the waste exists is so dangerous for the future generations.

We have so many health risks factors already.....I asked my doctors if you can't blame an illness caused by cigarettes what can you blame. The long lists began flowing. We have more to fear than a smoker health wise.

We need to clean up our lands, preservatives, carbon monoxide etc from cars and airplanes and on and on and on. Seems with all the natural catastrophes that are occurring, mmmmmmm must have something we are doing might just be the root of all evils.

Lordy be, the next generations will be deaf from the boom speakers in cars, cancer ridden at birth now. Won't be long until our race will have pointed heads and be 4 feet in height, waddling from obesity.

We are short on all commodities and help everyone in the world but those of us that really count in our country.

No, No, No....think ahead people and stop and smell the roses!!!!

I have been Poland and all the neighboring countries. I have seen and heard about things never released to the public here and abroad from Nuclear wastes.....ever see children playing outside in much of the countries in rural areas or see them playing in streams and water ways? Do some research, take some visits, ask the peasants and then think things over.....then vote

Subject: Oh goody

Tennessee can burn the wastes, release the toxins into the air, water ways and building sites. What a marvelous idea. Whose pocket financially will this fill? Do they have kids and grandkids? We take all the dangerous stuff out here and send the good stuff to Utah, how nice for them.

We moved from Ohio to this beautiful state of hills and hollers, lets fill them to the brim with crap, just for kicks and giggles.....no wonder the words red neck was born.....think the redness comes from embarrassment of the lawmakers.

Guess this is a PS to my first comment I sent. Jane Crawford
