Subject: EnergySolutions Import License Application IW023

To whom it may concern, I have recently been informed that you (the Nuclear Regulator Commission) are considering the Energy Solutions Import License Application IW023. This would allow Italy and probably other countries to ship to this country their radioactive waste, which we would then process and store. I feel (as does everyone I've talked to about this) that this is a VERY bad idea! The handling and storage of our own radioactive waste is a large enough undertaking and its potential hazards adds to the problem. We don't need to compound this situation by taking on waste from other countries. I am strongly against this proposal or anything similar to it!!

Very Concerned Citizen, Jim Doney
