OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFFF
2325

Office of the ~~Secretary~~ Secretary
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555
Attention: Rulemaking and Adjudications.

I am writing in regard to
Energy Solutions Import License
application IWR3.

I think it would be a terrible
idea to accept 20,000 tons of
radioactive waste from states
or any other country around
the world.

If our foreign policy has
evolved to the point that
we would take nuclear waste
from around the world to try
to amend it through this
service, it just isn't worth
it. We have enough of a burden
to have sit our own nuclear
waste till the end of time.

I was in a Naval outfit that
participated in the hydrogen tests.

at Bikini Atoll in the
Marshall Islands during the
summer of 1953.

From my experience during the
time I see ~~no~~ benefit
in becoming the world's
nuclear dumping grounds.

Sincerely,
Doyle Harris
