Subject: Comments on License App. IW023 and XW013

Dear NRC, I am writing to COMMENT AGAINST THE ENERGYSOLUTIONS PROPOSAL . I am asking that you say NO to License Applications Nos. IW023 and XW013 (Federal Register Volume 73, Number 28, 2/11/08) Not only is this application dangerous and poses a serious health threat to Tennesseans and all southern states, it goes directly against our Constitution right to Life as Nuclear exposure has been proven to shorten life and cause death including cancer and other diseases.

Nuclear waste processing from other countries should not only be illegal but is dangerous. When you consider that we are becoming the nuclear waste dumping ground of the world it feels like a disgrace.

One of the biggest threats right now is EnergySolutions' application to the US Nuclear Regulatory Commission (NRC) is to import a million cubic yards, 20,000 tons of nuclear waste from the defunct nuclear power industry in ITALY. The waste would be processed in the TDEC-licensed EnergySolutions nuclear incinerators, metal melter and other physical and chemical radioactive facilities.

Please ban this procedure and also look into removing agreement states in general as the fox does not guard the henhouse and we Tennessee should not be regulating itself when you consider that Tennessee is gaining profit from this procedure.

DOCKETED
