Secretary, U.S. Nuclear Regulatory Commission
Attention: Rulemaking and Adjudication Staff

I am a 64 year-old female citizen and the time for me on this planet is drawing somewhat to a close, so this letter is written because of the concern I have for my children, grandchildren and future generations. I love and appreciate the freedom to voice our concerns to our local and federal governments. This is one of the few times I have exercised this right, I say this not with pride, but with hope, that you will understand the depth of my concern. As a concerned citizen, I have and will continue to read what is available regarding storage of nuclear waste in Utah. It is apparent to me that the disposal of Italy's nuclear waste is, without a doubt, NOT in the best interest of the citizens of Utah. The 'Three Mile Island' **accident** happened even though intelligent, thorough, people were in charge. The safety regulations have improved, but human error will always be a fear we would have to accept as a possibility and this will continue to be the issue we in Utah will have to live with. Long term harm cannot always be revealed in the present. I ask you to be cautious with this decision and.....

Please, no nuclear waste in Utah!
