Docket No. 11005711

Re: EnergySolutions' license import application

I would like to express my support for EnergySolutions' import application. As a nuclear services supplier to the nuclear industry international services competitiveness can directly related to flexibility in dealing with operational issues such as the resultant waste management. Frham Safety has been doing business with the Energy Solutions Bear Creek site for over 20 years and encourage the NRC to study all issues related to any changes to importation laws or regulations before any hasty action.

In addition, I would like to highlight the fact that the Tennessee Division of Radiological Health has reviewed EnergySolutions' application and determined that the scope of work meets its current Tennessee licenses. EnergySolutions is committed to following the requirements set by the licenses it holds. The NRC should again ensure that further regulations do not impede the regulatory oversight granted to Agreement States who can then determine the overall benefit of these industries to local economies.

I strongly urge the Commission to approve the license application. EnergySolutions has proven that it is a responsible company that performs at the highest level in the industry.

Thank you for your consideration.

Fred H. Nance Jr.  
Vice President  
Frham Safety
