Jim,

Thank you for sending this along.

It is probably just me, but I am confused by the last two sentences of the second paragraph of the letter.

I am I to understand that officers on the team in question would bring issues forward but a subset of officers were uncomfortable when bringing issues forward?

or

In general, officers on the team in question indicated that they would bring issues forward, but a subset would be uncomfortable and therefore would not bring issues forward.

Again, probably just me.

Fred

Bill/Bruce, this interim ltr. is meant to address the short term findings from the AIT. Longer term issues will result from the Special Inspection to follow the licensee's completion of their Root Cause evaluation. We may propose a deviation from the ROP in order to implement the appropriate inspection/oversight and management involvement in corrective actions. This track is under consideration since the ROP is not mature in this area and we defer to traditional enforcement. Longer term issues will also stem from the ongoing OI investigation including the potential for individual actions and/or DOJ involvement. Sam
