

DOCKETED
USNRC

May 30, 2008 (4:00pm)

OFFICE OF SECRETARY
RULEMAKINGS AND
ADJUDICATIONS STAFF

Don't let the United States become the world's radioactive waste dumping ground!
 I urge the Nuclear Regulatory Commission to deny license applications 1W023 and
 XW013. These applications would allow EnergySolutions to import some 20,000 tons—a
 million cubic feet—of radioactive waste from Italy into the United States. Energy
 Solutions proposes to ship this waste into SC and LA, “process” it in Tennessee, where it
 could be incinerated, dumped in regular trash landfills, or “recycled” into consumer and
 industrial goods, and then ship the remainder to Utah for shallow land burial.

This scheme is fraught with unnecessary danger, could increase radiation exposures to
 the public, and would set a terrible precedent. The United States must not become the
 dumping ground for the world's radioactive waste. These applications must be rejected.
