June 2, 2008

Docket No. 03001316
Control No. 142378

License No. 08-01728-01

Barry G. Brotman, M.D.
Radiation Safety Officer
Providence Hospital
1150 Varnum Street, N.E.
Washington, DC 20017

SUBJECT: PROVIDENCE HOSPITAL, ACCEPTANCE OF NOTIFICATION, AMENDMENT
NOT NEEDED, CONTROL NO. 142378

Dear Dr. Brotman:

Your letter dated April 21, 2008, is accepted as notification that you possess and use naturally-occurring and accelerator-produced radioactive material (NARM) under your current NRC license. Please note that Section 651(e) of the Energy Policy Act of 2005 expanded the definition of byproduct material to include NARM. Therefore, the radioisotopes and uses described in your letter (e.g., Ga-67 and Co-57) are already included on your NRC license under 10 CFR 35.65, 35.100, and 35.200. Additionally, we understand from conversations with your nuclear medicine department, that the facilities used for NARM and the authorized users are already described in your current NRC license and tie-downs. We also understand that you do not currently use PET isotopes (e.g., C-11, N-13, O-15, F-18, Rb-82) and that you will submit a notification to describe your shielded facilities if PET uses commence. If our understanding is incorrect, please notify us immediately.

Sincerely,

Original signed by Penny Lanzisera
