SUBJECT: OPERATOR LICENSING OPERATING TEST APPROVAL  
(CALVERT CLIFFS NUCLEAR POWER PLANT, UNIT NO. 1 AND 2)

Dear Mr. Spina:

The purpose of this letter is to confirm the final arrangements for the upcoming operator licensing examinations at the Calvert Cliffs Nuclear Power Plant.

The NRC has completed its review of the operator license applications submitted in connection with this examination and separately provided a list of approved applicants to William C. Holston, Manager, Nuclear Training. Note that any examination waivers and application denials have been addressed in separate correspondence.

The NRC has approved the operating test portion of the examination and will administer those tests to the applicants during the week of June 16, 2008. This examination has undergone extensive review by my staff and representatives responsible for licensed operator training at your facility. Based on this review I have concluded that the examination meets the guidelines of NUREG-1021, Supplement 1, for content, operational, and discrimination validity. You also agree that it meets NUREG-1021, Supplement 1 guidelines and is appropriate for measuring the qualifications of licensed operator applicants at your facility. If you determine that this examination is not appropriate for licensing operators at your facility, contact me, at (610) 337-5389.

We are currently reviewing your staff's written examination. We will notify you by letter when our review is finished, at which point you will be authorized to administer the written portion of the license exam.

Mr. Spina
