We concur with the inspector's recommendation to remove Griffiss Air Force Base, as a storage site for radioactive material, from our NRC Source Materials License STC-133. All licensable material has been relocated to the GSA FPRS Depot at Scotia, NY.

15. REMARKS (Review all other appropriate questions contained in "guide for the inspection of stockpiled materials and storage facilities," and, if deficiencies are found, give the appropriate guide numbers and complete details in this block)

This final report issued to reflect the Gamma Radiation monitoring of areas where the 4 licensable Lot of Tungsten Ores & Concentrates, specifically-Tungsten, Wolframite; Lot Nos. P-2627, P-2651-A, P-2651-B and P-2646; all ExContract No. GS-00P-3912(SCM)-6 were either permanently stored or prepared for shipment. These Lots were relocated to the GSA FPRS Depot, Scotia, NY under authority of Special Project DMZ-15004 during the period of 8/30 to 9/3/85. Effective with this relocation, these Lots will be included with monitoring of other licensable materials stored at that facility.

Since this material meets the DOT classification of "Radioactive material limited quantity, n.o.s." and conditions and limitations specified in 49CFR173.421 for excepted radioactive material, limited quantity, n.o.s., UN2910, the outside of each container was labeled as required and individually monitored prior to shipment-Results: < 0.5mr/hr. The surveyed areas were monitored using an Eberline Geiger Counter, Model E-120 last calibrated 10/3/84 which is permanently stored at the GSA FPRS Depot, Scotia, NY. Prior to use the instrument was checked for: zero adjustment, and readings against a calibration source available at the Scotia facility.

See attached-"Monitoring Radiation Report" for survey results.

16. RECOMMENDATIONS (Not to be construed by storage depot or facility as authorization to proceed with remedial measures beyond the scope of usual authority) Due to the fact that the licensable radioactive material has been removed from this facility, it is recommended that Griffiss AFB be removed from our Source Materials License STC-133 as a storage site.
