Desc: REACTOR SAFETY EVALUATION, Section 7, pages 194-224, VOLUME II, APED-5000-A, CLASS I, JULY 1965, FACILITY DESCRIPTION AND SAFETY ANALYSIS REPORT FOR THE GENERAL ELECTRIC TEST REACTOR (GETR).

NOTE: According to a letter from Nichols of NRC to Leyse, May 29, 2008, the NRC's PDR does not have APED-5000-A.

However, the NRC is the successor to government agencies that regulated the General Electric Test Reactor, License TR-1. As such, the NRC is required to have this document.

FeeCategory: Personal_Noncommercial

MediaType:

FeeCategory_Description:

Expedite_ImminentThreatText:

Expedite_UrgencyToInformText:

Waiver_Purpose: Documentation of history.

Waiver_ExtentToExtractAnalyze: I believe that the REACTOR SAFETY EVALUATION is likely more of a cover-up than an accurate description of the situation.

Waiver_SpecificActivityQuals: I have been in the atomic reactor business since 1950. Today, it is called nuclear power. I am very familiar with the GETR having worked very closely in its technical support from 1960 to 1967. I believe the public should know about certain events of the 1960s. I may place a section into my blog, "What we never told Suno!"

Waiver_ImpactPublicUnderstanding: The public may no longer accept the delayed cleanup of the GETR and its site.

Waiver_NatureOfPublic: There is now a large population, several hundred thousand, in the area.

Waiver_MeansOfDissemination: I have a blog, <http://nuclearpowerblog.blogspot.com> and I will disclose my analyses on that blog. I have already posted a lot of facts related to GETR.

Waiver_FreeToPublicOrFee: Access to my blog is free to the public. Of course, you may easily verify this.

Waiver_PrivateCommericalInterest: I have no commercial interest and it is unlikely that my blog will stimulate any among another party.
