NRC Review of Final Safety Analysis Report

NRC RAI NUMBER: 17.01-12

Pursuant to 10 CFR 52.79(a)(41), COL applicants must provide an evaluation of the facility against the Standard Review Plan (SRP) revision in effect 6 months before the docket date of the application. Where differences exist, the applicant's evaluation must discuss how the proposed alternative provides an acceptable method of complying with the Commission's regulations, or portions thereof, that underlie the corresponding SRP acceptance criteria. Regulatory Guide (RG) 1.206, Section C.1.17.5.3, states that COL applicants may use an existing QAPD that the NRC has approved for current use for either or both phases of its QAPD submittal, provided that the applicant identifies and justifies alternatives to, or differences from, the SRP in effect 6 months prior to the docket date of the application. Section 17.1 of the Bellefonte FSAR states that the existing TVA 10 CFR Part 50, Appendix B Quality Assurance Program (TVA-NQA-PLN-89) is used to provide oversight to its contractors that have been delegated the responsibility of design activities prior to COL issuance. Table 1.9-202, Conformance with SRP Acceptance Criteria, states that the FSAR Position is acceptable with regards to SRP 17.1. Pursuant to 10 CFR 52.79(a)(41), please provide the evaluation of the existing TVA QA program against the acceptance criteria in SRP 17.1.

BLN RAI ID: 0351

BLN RESPONSE:

A comparison was performed between the acceptance criteria for SRP 17.1 and TVA-NQA-PLN89-A. The comparison result indicates that the Quality Assurance Program conforms to the acceptance criteria of SRP 17.1. The evaluation is consistent with the evaluations of other SRPs and is appropriately reflected in COLA FSAR Table 1.9-202 as "Acceptable" for SRP 17.1.

This response is PLANT-SPECIFIC.
