Insert personal comments here: : There must be a reason why they aren't disposing of this waste in there own country. They created it and they should deal with it. There is no amount of money that would make this a viable option. The risk is way to great and ultimately taken by those of us who live here, not the corporations that are benefiting from these agreements financially. We should be focusing on reducing this type of toxic waste not creating a need for more and more disposal facilities.
