Mail Control 141448 License No(s). 47-25625-01 Docket No(s). 03033256
or Report No(s).

Name of Licensee: Salem International University

Name of Participant(s): Keith Bullion, Director of Science Department
Steven R. Courtemanche, Health Physicist, NRC RITelephone No. 304-326-1461
610-337-5075

Subject: New contact for termination of License

(NOTE: This will be used as the Documents Title in ADAMS)

Summary: 5/27/08 I spoke with the receptionist who indicated that Jennifer Adams no longer worked for the university. I asked for the Radiation Safety Officer and she put me through to a representative of Building Services. The individual stated that the Director of the Science Department was Keith Bullion.

12:45 I left a message on Mr. Bullion's voice-mail for him to get back in touch with me.

06/10/2008 09:50 Mr. Bullion returned my call and indicated that he had replaced Ms. Adams as the Radiation Safety Officer. He had questions as to what was needed to terminate the license.

14:00 I left a message for him to get back in touch with me.

6/11/2008 14:00 Mr. Bullion returned my phone call and asked me what type of information was on file in the docket. I informed him that it had been many years since licensed material was actually used but material for decay in storage and a vial that contained tritium were found during the NRC's November 2005 inspection. Radiological surveys were made of the laboratory space and no radiation dose rate levels exceeding background were detected. The rooms in the university where licensed material was used were in the Carlson Hall of Science, Rooms 240, 324, and 329. Mr. Bullion indicated that he would have an outside consultant perform a survey of the laboratory space since he could not determine if carbon-14 and tritium had not been used in the aforementioned labs. The methodology in NUREG-1757, Vol. 2, App. B would be used to conduct the survey using NRC pre-established screening values.
