**Subject:** Stop EnergySolutions' Italian nuclear waste import submission

Insert personal comments here: : It is my personal belief that if any nation wishes to enjoy the benefits of nuclear power, they need to carry the responsibility of dealing with the waste that results and the risks involved. To accept nuclear waste from Italy shows that the United States is willing to manage the risks that result from the decisions of other nations, while enjoying none of the benefits. It also shows a willingness to privatize the profit of waste managements, and commonizing the cost and risks associated, because Energy Solutions will be the main profitor of accepting waste, but the risks apply to everyone- if there is any accident, those who are hurt the most certainly would not be those who profited most.

Above all, accepting and storing nuclear waste in the U.S. shows that our own present, temporary economic prosperity is more important to us than the well-being and health of future generations, since how this waste will be managed over long periods of time is not fully understood yet. Accepting nuclear waste is the selfish thing to do.
