Subject: Stop EnergySolutions' Italian nuclear waste import submission

Insert personal comments here: : Dear Office of the Secretary, I am writing to request that you reject Energy Solution's recent proposal to import nuclear waste from Italy's defunct reactors.

This is an enormous importation of potentially dangerous materials. Once in Utah these materials will require generations of vigilant, expensive maintainence, and will never cease to be a potential hazard to public health. Perhaps worst of all, by accepting 20,000 tons of nuclear waste from a foreign country we are setting a dangerous precedent for Utah. The Utah desert and its people are too good to be treated like a waste dump.

While I understand that their is an attractive financial incentive, I feel the incredible risk brought with such hazardous material far outweighs any amount of money. By welcoming Italy's nuclear waste into Utah we are condemning future generations to deal with something we don't understand yet (EnergySolutions itself states in its application that "the sources of this material are not fully known") and could be potentially catastrophic.

I strongly urge the Commission to reject the application submitted by EnergySolutions. Thank you.
