Subject: Please Deny EnergySolutions' Import Application (IW023) submission

Comment : To: Office of the Secretary
Nuclear Regulatory Commission

I am only one of the vast majority of Utahns in opposition to granting EnergySolutions import licenses for 20,000 tons of Italian nuclear waste. By vote and by editorial opinion, the people of Utah have on several occasions rejected the idea of importing foreign nuclear material into our state. Periodically, EnergySolutions has denied its intentions to store such waste here, only to attempt to bring in the waste under the cover of a few, but highly placed, legislative leaders who stand to gain economically by their connection to EnergySolutions.

Looking ahead to the all but inevitable energy crisis in our nation's future, American nuclear power may become a necessity. We cannot afford to use up potential waste sites for material from outside the United States. Nor do we in Utah wish to be exposed to the dangers derived from transporting this waste through our cities and countryside. EnergySolutions appears to have no clear idea of what the effect of this waste will be on the surrounding countryside, and for that reason alone, their application should be rejected by the Commission.
