Subject: Visit to NMP

1. I assume you are the POC for the Ginna trip as well. I would like to make sure we have what we need on the agenda. Have you begun coordination with Tomika, Laura Quinn or Tom F. ? Let me know where you stand on this.

2. For the NMP we need a schedule. Can you provide a draft? We would like to work in presentations to the majority of folks on the following subjects:

1. Company and COLA organization. Who does what; some wiring diagrams
2. Alternative site study - particularly how you get from the ROI to the alternatives. Describe the process.
3. Status of Permits and Interactions with other Federal, State and local entities. As a subset, describe the State of New York licensing process. How will that mesh with our process. Describe any interactions with the US FWS. also plans for the 401 Cert., NPDES permit, and CZMA?
4. Status of environmental monitoring, by discipline, being conducted in support of the COLA
5. Schedule as you see it to include State and Corps of Engineers review.
6. Transmission lines - upgrades, corridor widening, new routes. Discuss State requirements in the area of T-lines. Describe and discuss any studies designed to determine new routes.

I presume we will have the usual ride around the site, then return to break into the various disciplines. No boat ride at this time. Try to finish general tour, presentations, and any special tours (T-lines, Met tower, onsite terrestrial, intake/discharge areas, etc.) on Tuesday - long day if necessary. Meet with counterparts in breakout sessions on Wednesday AM, with closeout at 1100 hrs on Wednesday. Ambitious but doable.

I am in today, tomorrow and part of Wednesday. Out of net late Wednesday till first thing the 21st of Apr. Reachable by cell phone.
