SUBJECT: INITIAL OPERATOR LICENSING EXAMINATION WRITTEN TEST APPROVAL
(CALVERT CLIFFS NUCLEAR POWER PLANT)

Dear Mr. Spina:

The purpose of this letter is to confirm the final arrangements for the upcoming operator licensing examinations at the Calvert Cliffs Nuclear Power Plant. The NRC has approved the written test portion of the examination. Your staff is authorized to administer those tests to the applicants during the week of June 23, 2008.

This examination has undergone extensive review by my staff and representatives responsible for licensed operator training at your facility. Based on this review I have concluded that the examination meets the guidelines of NUREG-1021 for content, operational, and discrimination validity. You also agree that it meets NUREG-1021 guidelines, and is appropriate for measuring the qualifications of licensed operator applicants at your facility. If you determine that this examination is not appropriate for licensing operators at your facility, do not administer the examination and contact me at (610) 337-5389. The operating test portion of the exam was previously approved for administration in my letter dated June 5, 2008.

Please contact your Chief Examiner, David Silk, at 610-337-5372, if you have any questions or identify any errors or changes in the license level (RO or SRO) or type of examination (partial or complete written examination and/or operating test) specified for each applicant.

Sincerely,

/RA/

John Caruso, Chief
Operations Branch
Division of Reactor Safety
