 Subject: XW013 & IW023

When the founding fathers of this country were developing our form of government, they were concerned that the common person could not understand enough about the inner or outer workings of the government to effectively govern themselves and protect themselves. That is why they tried to develop a government of the people, by the people and **FOR THE PEOLPE**. Since the NRC is supposed to be a part of the government, a part of your role should be to protect all those who cannot protect themselves from threats outside and inside this country.

Nuclear energy in the US is currently unable to take care of the waste being produced in the US. To import more from outside the US borders on the insane, uncaring, unconcerned, whatever unflattering adjective chosen. Waste products from Italy and/or wherever else are being dumped in my back yard. It is being processed into more material that has to be stored somewhere.

**THERE IS CURRENTLY NO PLACE TO PUT THIS STUFF. NO MATTER WHAT IS DONE TO IT, IT IS NOT SAFE.** Utah refuses to have any waste stored there. That means storage where it is formed or in Tennessee, my backyard.

I oppose application for any more nuclear plants to be built, started up, or re-started. More time is needed for additional comments from people like myself who are just finding out about this. Any application should be subject to well advertised public hearings. (The last NRC meeting I went to was so poorly advertised, the people on campus didn't even know where it was.)

Since you seem to think this is so safe, perhaps the waste could be dumped in your literal back yards, for your children and grandchildren and their grandchildren, ect. to play in.

Vote for your city's best dining and nightlife. City's Best 2008.

DOCKETED
