Subject: Storage of Nuclear Waste

Dear Sirs:

I am apposed to having foreign countrys send their radioactive waste to the Unite States. They can store it there as easily as we can here. We do not have a waste repository site at this time and probably won't at any time soon. The nuclear utilities in this country have to store their own used fuel and nuclear waste on site. Why should other countries be any different?

I have worked in the nuclear field for the past 27 years and can see no reason for us to become the radioactive waste site for the rest of the world.

Please consider letting the countries with radioactive waste keep it there!

V/R

Charles L. Pixler
