Office of the Secretary,
U.S. Nuclear Regulatory Commission
Washington, D. C. 20555

Sir:

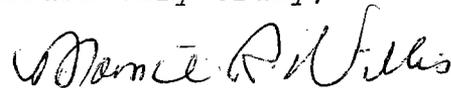

Re: Energy Solutions Import
License application IW023

It is unthinkable that this subject should even come up.
It is beyond explanation or justification, that we import tons
of nuclear waste from another country.

Surely you are aware by now, that we Americans are highly
suspicious of anything that "smells", and this idea decidedly
smells. We know that secret things go on which will one day be
revealed. There is much action backed by personal gain or
political advantage which is not in the best interest of the
citizens. We'd just like to know what is behind this.

Wake up, politicians. The citizens are wide awake! If everyone
took the time to write and voice an opinion on this, you'd find
they all agree with me.

Yours very truly,

(Mrs.) Mamie R. Willis

P. S. I am nealry 89 years old. I have seen administrations
come and go. Our country has been on a down-hill slide for
a long time.
