Nuclear Regulatory Commission,

We would like to take a moment to let our voices be heard. We do not want to see a law passed that would allow Italy or any other country to use the United States as a nuclear dumping ground. Further, we do not want to see our homestate become the processing place for other countries excess nuclear waste. Every country should be responsible for their own nuclear waste. When we allow other countries to send their waste here, we believe that opens a door for terrorism. Most likely there would be millions, if not billions, of taxpayers dollars spent monitoring another country's waste.

Please make the right decision - Do Not allow other countries to use the U.S. as a dumping ground.

DOCKETED  
USNRC
