Re: NRC License #45-16806-01 03011672  
Control # 142338

Dear Ms. Weidner:

In reference to the above license and control number, we are writing you to document that Loudoun Hospital has never been in possession of Cs-137 Model CDC.S or CDC.3. These were originally put on our license in case we needed to purchase them for our brachytherapy program.

Please remove the sealed sources including 3M Model 6500 Series and AEA Technology Models CDC.S and CDC.T1.

We wish to keep the Best Medical Model 2301 and the Mills Biopharmaceuticals Model 1-125 SL, for our prostate seed program.

This hospital was only in possession of the 6500 Series and the Model CDC.T1. All sources have been removed as previously noted in a letter to the NRC dated April 18, 2008.

Sincerely,

Susan Carroll  
Chief Operating Officer

Cc: Punam Dutt, Director of Oncology Services  
Deirdre Cahill, Director of Diagnostic Imaging  
Arnie Able, Radiation Safety Officer
