Docket No. 03029484
Control No. 142420

License No. 47-24864-01

D. Parker Haddix
Chief Operating Officer
Davis Memorial Hospital
P.O. Box 1484

SUBJECT: DAVIS MEMORIAL HOSPITAL, LICENSE AMENDMENT, CONTROL NO.
142420

Dear Mr. Haddix:

This refers to your license amendment request. Enclosed with this letter is the amended license. This amendment adds the new hot lab as requested to enable you to move your licensed activities. Prior to release of your current hot lab for unrestricted use, you must receive an amendment removing the old hot lab from your license. 10 CFR 35.13(e) requires that an amendment be received by the licensee before it adds to or changes an area of use. An exemption is granted for areas where only 35.100 and 35.200 materials were used or stored. However, because your license authorizes the use and storage of 35.300 materials, you will need to provide the results of surveys demonstrating that the levels of residual activity in the old hot lab are acceptable. When you submit the amendment request, please refer to the Control Number at the top of this letter.

Please review the enclosed document carefully and be sure that you understand and fully implement all the conditions incorporated into the amended license. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5239, so that we can provide appropriate corrections and answers.

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14).

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Medical, Academic, and Industrial Uses of Nuclear Material**; then **Regulations, Guidance, and Communications**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 7:00 a.m. to 8:00 p.m. EST, Monday through Friday (except Federal holidays).

13. In addition to the possession limits in Item 8, the licensee shall further restrict the possession of licensed material to quantities below the minimum limit specified in 10 CFR 30.35(d) for establishing decommissioning financial assurance.
14. Sealed sources or detector cells containing licensed material shall not be opened or sources removed from source holders by the licensee.
15. The licensee is authorized to transport licensed material in accordance with the provisions of 10 CFR Part 71, "Packaging and Transportation of Radioactive Material."
16. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents, including any enclosures, listed below. This license condition applies only to those procedures that are required to be submitted in accordance with the regulations. Additionally, this license condition does not limit the licensee's ability to make changes to the radiation protection program as provided for in 10 CFR 35.26. The U.S. Nuclear Regulatory Commission's regulations shall govern unless the statements, representations, and procedures in the licensee's application and correspondence are more restrictive than the regulations.
