Mr. Frank Davis
U. S. Atomic Energy Commission
Division of Materials Licensing
Washington, D. C. 20545

Dear Frank:

Confirming our telephone conversation of July 1, the "Double Encapsulated Source" per Drawing A-200007 is a typical double encapsulated source since, in general, our customers require specific source configurations to meet their own requirements. Therefore, we withdraw our request of May 23 that this source be approved for sale and instead submit the information on the typical double encapsulated source for informational purposes only.

I hope this will be sufficient information to allow you to approve the clad wire coil sources. If you desire any additional information, please advise.

Sincerely,

NEUTRON PRODUCTS, INC.
